

The Hairdryer Chronicles 2

If we don't get the beginning correct, all will fall.

DENIAL

The universe is energy.

Energy didn't just HAPPEN – it had a beginning and it had a cause.

The energetic universe was caused by resistance to **One/eternity/God**.

Resistance is denial and denial is emotion – emotion is energy.

The energy of denial is consensual; it is **all as one**... antithesis.

All together we are contained in a packet of denial; a packet of energy called **Quantum**.

THE CHICKEN OR THE EGG

What came first...?

There is no 1st and 2nd, there is a circle opening and closing:

The opening represents the chicken and the closing represents the egg; now a chicken then an egg – now an egg then a chicken.

This is a metaphor for creation.

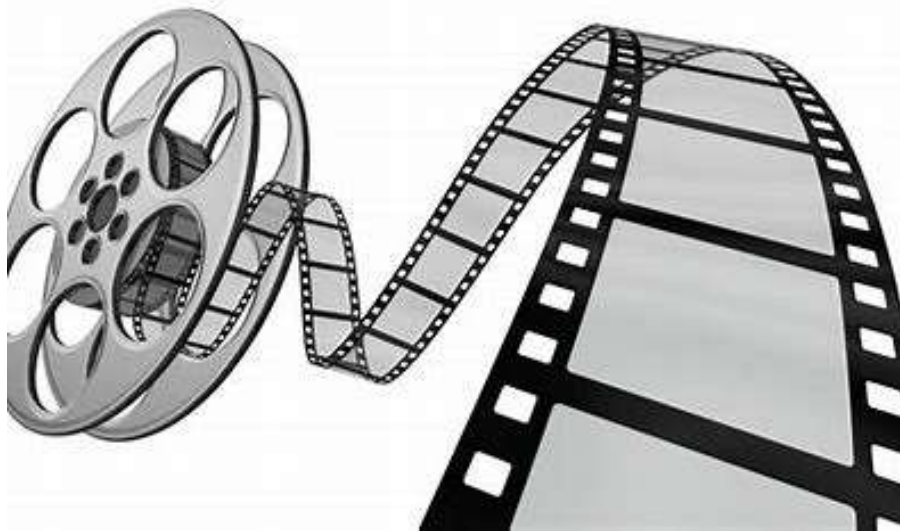

In the beginning, resistance to **One** caused a reaction of absolute force for the least time. This is the Quantum: **$6.62607004 \times 10^{-34} \text{ m}^2 \text{ kg seconds}$** .

But, resistance is denial and denial is emotion, and emotion has energy.

Therefore, the resistance that caused the 'big bang' has its own positive/negative disposition.

And thus, the silent energy is present within every frame of the 'big bang' release.

THE FRAME

One frame! One frame!

One inside out

One flippin' frame.

Only One

One frame for all our movies

One inside out

One flippin' frame.

Now, now, all is now!

One frame!

One flippin' frame

TIMELESS!

All our movies from one frame
A timeless frame
Everything different
But still the same.

Happening so fast
Our senses reveal
the stories we feel
We believe what seems real.

Lost in our movies
Lost in time
Lost and entwined
In the illusion of time.

One frame! One frame!
One inside out
One flippin' frame.

*

Each frame disappears beyond the material universe at the speed of gravity - to continue its acceleration between the poles of the silent energy, thus, concluding the entire universe of cause and effect to One/eternity.
