

THE HAIRDRYER CHRONICLES

"Every living being is an engine geared to the wheelwork of the universe..." - **Nikola Tesla.**

By TOM KITT

The universe works just as does any electric hairdryer or drill: one cycle spinning an output for work to be done. The hairdryer is plugged into an a/c outlet whereas the universe is plugged into eternity.

“Draw from it as you will, it never runs dry.” – Tao Te Ching.

A SPARK TO FIRE

“Eternity is the source of energy.” ~ Nikola Tesla.

In the beginning there came a **spark** that continues to repeat.

The universe is a fire of sparks.

All outputs are structures of the original block of energy/spark.

The universe is supported free, on demand, from **eternity**...

“Draw from it as you will, it never runs dry.” – Tao Te Ching (340BC).

Every time you use your hairdryer you are demonstrating an archetype of the universal cycle.

GATEWAY

Energy began when **all as one** resisted One **is all**.

One **is all**: God.

The resistance caused a **spark** of unlimited potential for the least time.

The eternal spark repeats until resistance is shed.

The constant on/off opens the gateway for **all as one** to come through.

THE COLLECTIVE SPARK

“Eternity is the source of energy.” – **Nikola Tesla.**

One spark of resistance opened the universe to limitless possibilities.

In 1900, **Max Planck** established the energy value of the spark as: **$6.62607004 \times 10^{-34} \text{ m}^2 \text{ kg seconds}$** .

Planck's constant is unlimited potential wound into the least possible amount of time.

The universe is a fire of sparks taking **time** to burn.

The resistance that caused the spark is hidden in the fire.

DREAMSCAPE...

“I observed two pet pigs packed into the back seat of a small convertible. The driver was taking them for surgical procedures, in Europe, it seemed...

Then, the scene changed to an abattoir and the raw fear of cattle coming through a chute, one by one, to be struck on the head with a sledgehammer.

The next showed the driver at home serving steaks to dinner guests.”

The sum of who we think we are – **all as one**, has put the fear of God into us.

“People will do anything, no matter how absurd, to avoid facing their own souls.” – Carl Jung.

NON-LOCALITY

“He who grasps the truth of the Mental Nature of the Universe is well advanced on The Path to Mastery.” - Three Initiates, *The Kybalion: A Study of the Hermetic Philosophy of Ancient Egypt and Greece.*

Resistance grows as repetition increases.

We are one made many absolved by non-locality.

“Hear no evil. See no evil. Speak no evil.” – Lao Tzu, 340BC.

WITHDRAWAL

Resistance to **eternity** produced a spark of unlimited force for the least time.

The spark repeats - empties and refills without cost.

“Eternity is the source of energy.” – Nikola Tesla.

“Draw from it as you will, it never runs dry....” – Tao Te Ching, 340BC..

“Ask and you shall receive” - Matthew 7:7.

- The value of the spark/energy is Planck’s constant: **$6.62607004 \times 10^{-34} \text{ m}^2 \text{ kg seconds}$** .

This is the QUANTUM.

The universe is the secondary result of quantum repetition – a spark to fire!

THE MORTAL COIL

All things are wound-up coils of unlimited potential.

Your location within the spectral hierarchy is dictated by your thinking.

As you embrace eternal recurrence through its attendant archetypes your body will vibrate in accord.

In due course you will involve beyond the fear of death as we know it.

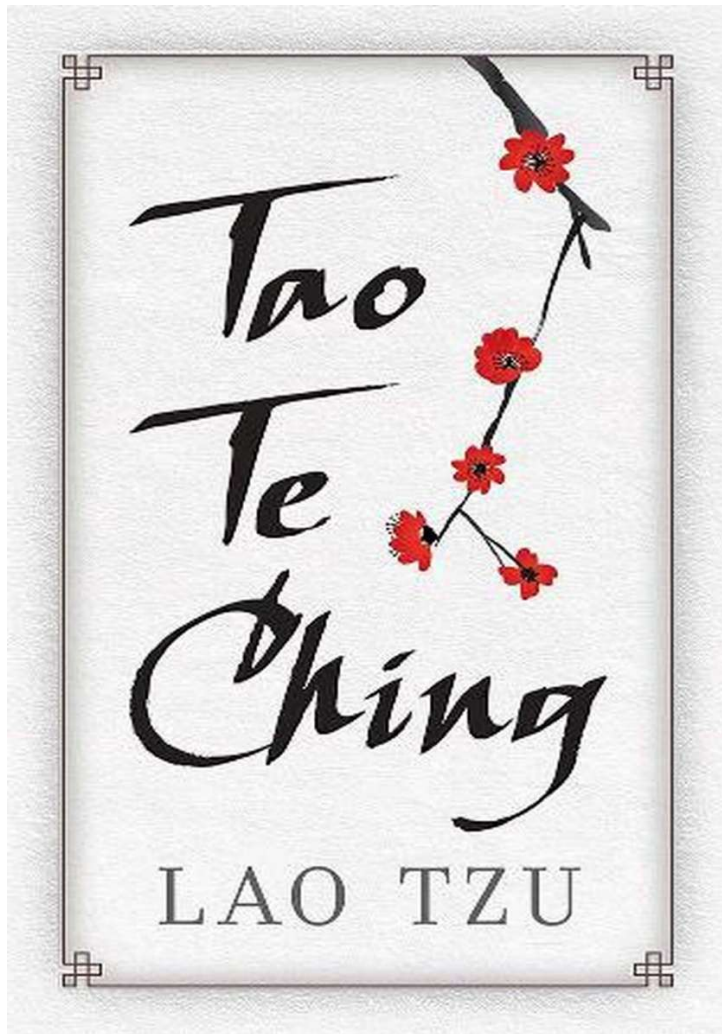

You will be increasingly inclusive – increasingly alive!

This is the process we must abide.

ONE is all.

THE WAY

Humility is the anchoring principle of divine exchange.

ONE is all.

It is this absolute that enables one to draw from the eternal mother-lode with impunity.

Withdrawals increase until it becomes evident that building structures for their own sake is ultimately futile.

We build our dreams so that we may learn from them; that we may learn the

truth of who we are.

All constructs are drawn from the well of eternity yet many believe they are their own cause and effect.

Everything glows with divinity and to claim exclusively in terms of this or that is to negate the objective of equanimity – One **is** all.

We learn this when we die;

...but, again and again and again we repeat - never in the same form but always in perfect form.

“I am different from ordinary people. I drink from the Great Mother's breasts.”

— Lao Tzu, Tao Te Ching.

THE VEHICLE

The truth: One is all.

You are God, so am I and so is my dog or a gust of wind.

God came to energy as the complementary opposite of resistance.

The primal duality is the root/seed of all things: SILENT within every emerging detail.

All things are archetypes of the original - take a hairdryer or a kitchen appliance asunder and at its heart you will discover a rotating magnet producing output for work to be done.

The primal spark is the prototype of all: a magnet rotating just as a hairdryer except its power comes, on demand, from the limitless source of eternity.

Archetypes are our tools to learn by.

NEEDLE

The **universe** is an energy system that began when resistance to eternity caused a spark of energy.

It is all-important to realize that the cause of the spark is **silent**.

The energy packet/spark repeats to become the fabric of the universe.

We are bound to the fabric because we are turns of the same resistance – a needle at work.

Find the needle and you will knit your own experience.

CONSCIOUSNESS

“The unity once possessed has been lost, and must now be found again.”

– Carl Jung.

The universe is the secondary result of one **eternally** recurring spark of movement.

The energy of the movement is **Planck's constant**: $6.62607004 \times 10^{-34} \text{ m}^2 \text{ kg}$ seconds.

Planck's constant is the **Quantum**.

- The quantum packet is unlimited energy for the least time.

Eternal recurrence enables the consciousness necessary to engage the possibility of pacifying the quantum's energy.

THE IMMORTAL COIL

“Treat everyone that you meet as if they are God in drag.” – Alan Watts.

One is all means each thing is God.

We are wound-up coils to be released.

Energy began when the least resistance split One in two.

The material world is growth of resistance – coils upon coils maintained by consensus.

The **silent** duality is everywhere at once - a seed growing...

Just as nature comes and goes so also the universe.

"Every living being is an engine geared to the wheelwork of the universe." -

Nikola Tesla.

THE ONE POSITIVE

God does not exist in energy.

The first energy was the **silent** positive/negative that resulted when One was resisted.

The primal energy is Planck's constant: **$6.62607004 \times 10^{-34} \text{ m}^2 \text{ kg seconds}$** .

The universe is the secondary result of quantum repetition.

This is proven by the abundance of archetypes that inundate the universe; take

apart anything at all and you will find a rotating movement producing output.

The object of repetition is to catalyze a change of direction that embraces the **silent** positive.

One **is** all.

No one has a right not to know who they are.
