

THE HAIRDRYER CHRONICLES

Chapter 2 (21 pages)

The universe is disappearing at the speed of gravity.

MAX PLANCK'S DISCOVERY

The 'big bang' is not as prescribed.

It is an eternally recurring event whose energy is **Planck's constant:**
 $6.62607004 \times 10^{-34} \text{ m}^2 \text{ kg seconds}$.

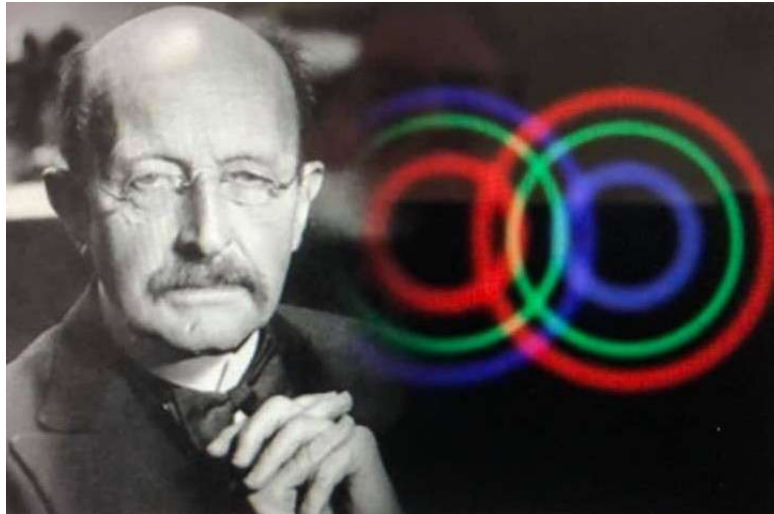

Planck's constant includes the energy of the **resistance** that caused it, and is so minute you could hold it in the palm of your hand and not know it's there.

Yet, its repetition yields the universe.

"Hold infinity in the palm of your hand..." - Wm. Blake.

THE CENTER-POINT

Everything spins from the same center.

Resistance to Eternity/One sparked Planck's constant: **6.62607004 x 10⁻³⁴ m² kg seconds.**

Eternity inside out: unlimited force for the least time.

The '**least time**' dilutes the force to the first energy: the first positive/negative.

This seed grows by repeating itself.

In this way, the force is released to become the universe.

Nature points the way but most humans don't know how a flower grows.

"The cardinal error of science lies in shutting the Creator out of His Creation." - Walter Russell.

CONUNDRUM

The **resistance** that caused the 'soft bang' is also energy because it is a condition of objection. Thus, it is included in Planck's constant.

The **Planck constant** is a movement out of time: cause and effect gathered to One.

The energy packet repeats for as long as there is resistance.

MECHANISM

The universe is an interactive mechanism of similar bits.

The first bit:

Resistance to One/eternity was initiated by an objective **thought**.

Thought caused the first spark of energy. (Planck's constant)

The universe is the result of **thought** – thinking!

Thinking is the movement of thought; a wheel turning.

Thought and thinking are inextricably bound.

Each turn of the wheel has the same energy; the eternal One gives without objection.

“Draw from it as you will, it never run dry.” – Tao Te Ching (340BC)

The sum of turns in any moment is the evolving universe.

The above mechanism may be likened to a variable speed electric drill, except the universal mechanism is plugged into eternity.

FREE ENERGY

“Every living being is an engine geared to the wheelwork of the universe.” – Nikola Tesla.

Everything is a cog in the universal wheel.

Investigate anything you wish and you will eventually arrive at a wheel turning out product.

Cyclic to linear generation is universal – all archetypes are fed by the eternal wheel.

“Draw from it as you will. It never runs dry.” – Tao Te Ching

DISAPPEARANCE

“Eternity is the source of energy.” – Nikola Tesla.

Planck's Constant ($6.62607004 \times 10^{-34} \text{ m}^2 \text{ kg seconds}$) is a movement out of time; a movement in/out of eternity – such as a circle opening and closing.

It is now 124 years since **Max Planck** presented the world with his discovery.

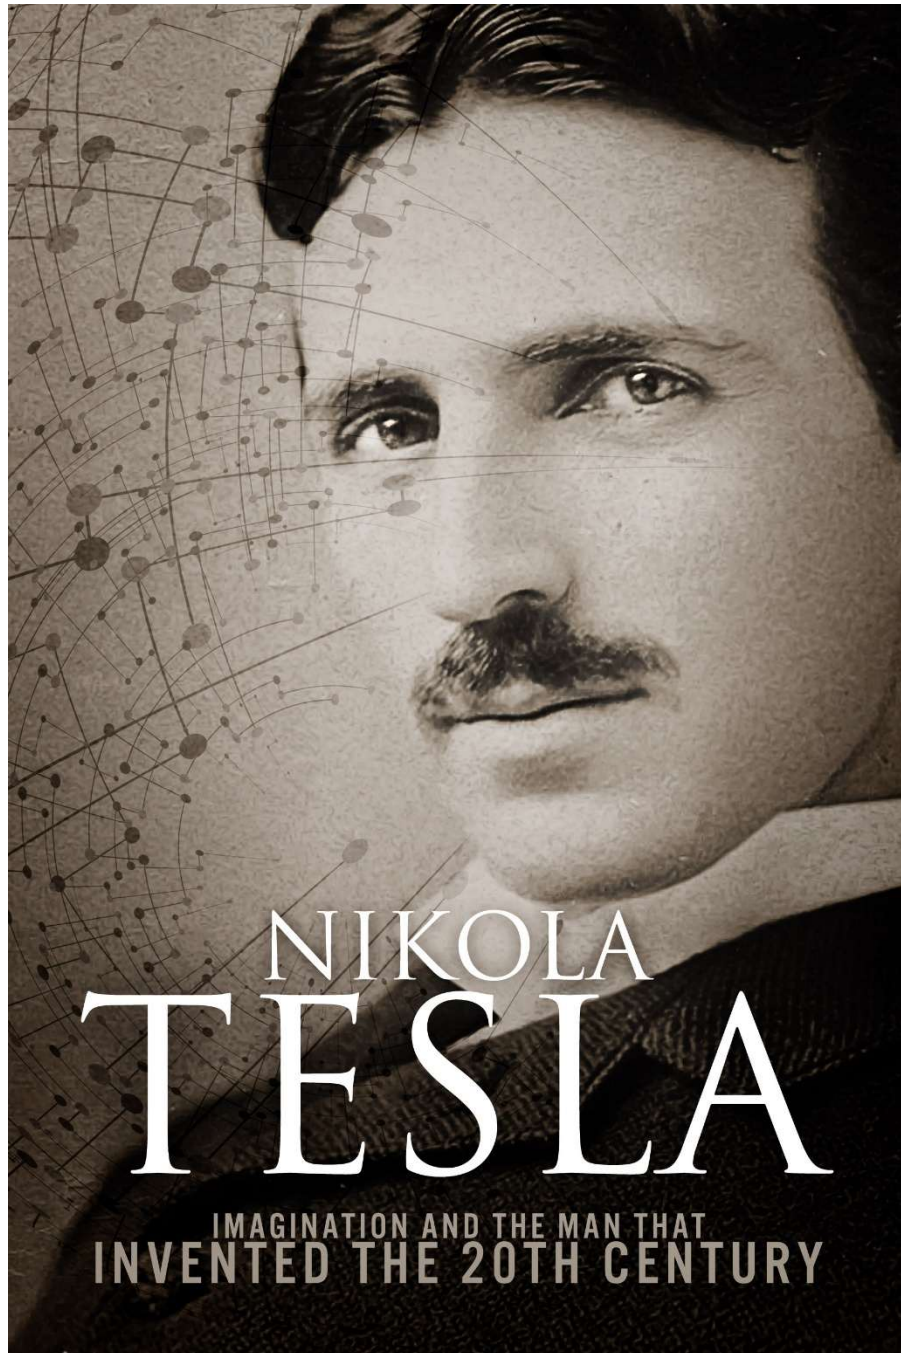

To reiterate:

The universe is the secondary result of the same movement repeating from nothing/eternity.

The universe disappears with each repeat.

NIKOLA TESLA

“Eternity is the source of energy.” – Nikola Tesla.

Nikola Tesla was inspired by Planck's discovery of 'eternal re-occurrence' and set about putting it into practice for the common good.

All of Tesla's inventions are practical applications of what is happening anyway. Fail safe!

From alternating current to computers to hairdryers and everything else besides, the universe is inundated with archetypes of the same eternal movement.

Take any item and investigate it, sooner or later you will discover that its core is a cyclic to linear event – a wheel rotating to produce output. Each cycle is refilled with the Planck energy packet just as a vehicle at a gas station.

“Draw from it as you will, it never runs dry.” Tao Te Ching.

THE ENERGY QUANTUM

Planck's constant =

$$6.62606957 \times 10^{-34} \text{ m}^2 \text{ kg} / \text{s}$$

Planck's constant is a movement of unlimited force for the least time.
It is **eternity** inside out.

As the movement repeats **time** accumulates allowing the force to manifest.

With each turn of the wheel all is gathered back to eternity.

Studying the universe from a platform of time is misleading unless Planck's constant is recognized and acknowledged.

"We live in a time that has no concept of the simplicity of truth." –
Hypatia of Alexandria by Manly Hall.

SPARK TO FIRE

The quantum ($6.62607004 \times 10^{-34} \text{ m}^2 \text{ kg seconds}$) is unlimited force for the least time; it is the spark of the universe.

As the quantum re-occurs **time** is gathered for the universe to exist.

Yet, all is dissolving to eternity at the speed of gravity.

PLANCK TIME

Planck's constant is a movement out of time.

The movement was initiated by resistance to **eternity** and may be considered a circle opening and closing – a wheel.

Eternity inside out is a movement of unlimited force.

The tenure of the force was/is for the least **time** – you could hold it in the palm of your hand and not know it's there ($6.62607004 \times 10^{-34}$ m² kg seconds).

As the wheel turns, time/energy accumulate for the universe to exist.

A wheel reloading from eternity is all.

“Draw from it as you will, it never runs dry.” – Tao Te Ching.

OUT OF TIME

The eternal **One** was resisted and became two: positive/negative.

The force of response was eternity inside out for the least **time**.

But annihilation is not reconciliation so the resistance reappears until satisfied.

Each turn of the eternal wheel accumulates the same bit of time.

Time/resistance increases as the wheel turns, yet each cycle is disappearing out of time.

The sum of cycles is the universe in any moment, and whereas we maintain our **facades** in time, the truth is, all is disappearing to eternity at the speed of gravity.

FACADE

The universe is accumulation of the same **Thought**.
(objection/resistance)

Life is a façade maintained by thinking.

Thinking is the movement of Thought: one and the same!

ETERNITY IS LOVE

The universe is a mass of resistance to **eternity**.

The mass is a façade that disappears with each turn of the eternal wheel.

Thought directs the thinking necessary to protect us from the truth.

Each emerging sub-system becomes increasingly vested in its own expression.

* The collective is the expression of thought.

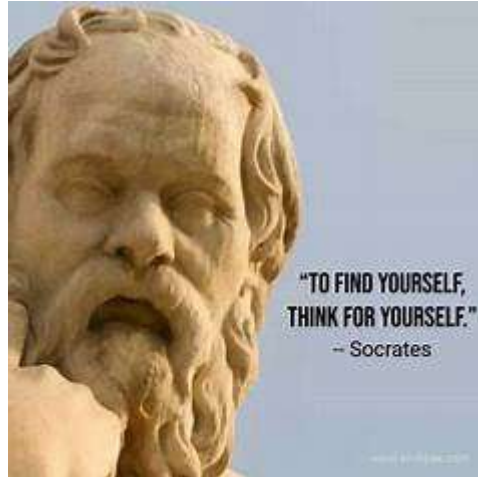

Thought is everywhere at once, directing its collective mass to build facades and barricades against the truth.

The truth: the collective mass - the universe, is disappearing out of time at the speed of gravity.

The universe maintains its façade by repeating its original experience, this continues until the **silent** cause of our denial is revealed.

Eternity is love without condition.

DENIAL

The mind of the universal mass is the sum of its parts.

We are of one mind bound in hierarchical patterns for protection.

“The whole is more than the sum of its parts.” – Aristotle.

The ‘whole’ is the smallest particle: everywhere at once.

This is why we cannot accept **Planck’s constant** as an eternally recurring movement.

EVERYWHERE AT ONCE

Resistance sparked the exodus from **eternity**.

The energy was quenched in the least **time** – eternity inside out.

This time/energy packet is **Planck's constant**: one movement exiting and returning to eternity at the speed of gravity – such as a circle opening and closing.

The positive/negative poles of Planck's constant are thesis/antithesis.

The Planck energy is **silent** because it 'lands softly' in eternity – no crash-point. This is the eternal wheel.

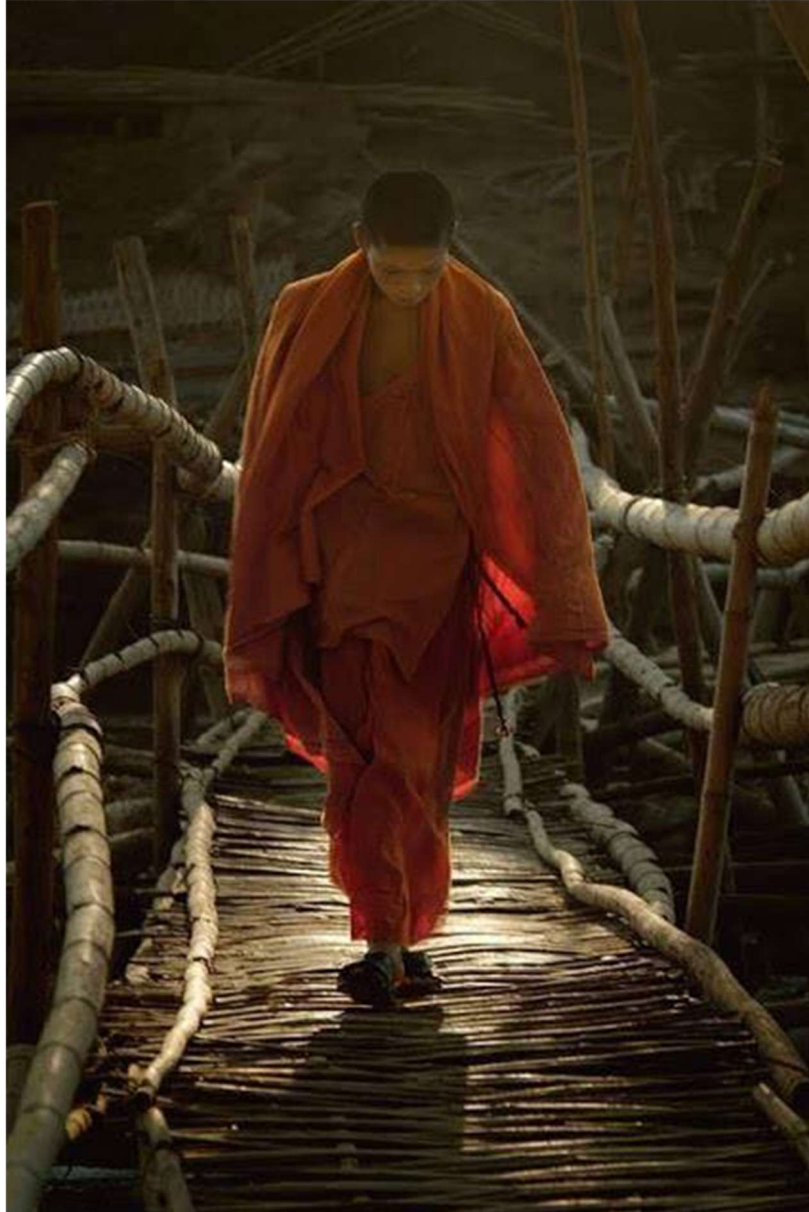

The turning of the wheel produces the universe as secondary issue; building blocks of the same energy packet.

Throughout the universe the cause of the building block is immanent.

“I received a telephone call one day at the graduate college at Princeton from Professor Wheeler, in which he said, “Feynman, I know why all electrons have the same charge and the same mass” “Why?” “Because they are all the same electron!” ~ Richard Feynman.

PERFECT

“Life is a perfect orchestration of love. Perfect, perfect, always perfect!”

“We order pain to show the way”

The first manifestation/spark of resistance was a **silent** positive/negative.

The **one-positive** and the **one-negative** are unique; not only are they complementary opposites, they also form the gateway to eternity.

The vibration of the gateway is the sum of rotations in any moment.

Each rotation gathers to the next and as a wheel turning it gains momentum, but, no matter the outer shell all is returning through the gateway at the speed of gravity.

Thinking engorges negativity whereas the one-positive is sacrosanct.

Every rotation is perfectly advised by the one-positive.

Be aware you are divine
You order pain to show the way
Heaven is a moment everlasting and whole
Pain is love showing us home
Perfect, perfect, always perfect.

Release your bondage and acquiesce
Become a creature of the dance
A passenger on a ride
Rise and fall
Perfect, perfect, always perfect.

Don't disturb the Maestro's gift
Move in harmony's wake
Be perfection in your moments

Love is all
Perfect, perfect, always perfect.

Enter the rhythm of the dance
Mine is yours, yours is mine
Relax in the peace of knowing
You are shadow to yourself
Perfect, perfect, always perfect.

Know this truth
Relax!
Allow your rhythm find its tone
No limitations, no fear
Perfect, perfect, always perfect.
