

THE HAIRDRYER CHRONICLES

Chapter 3 ...work in progress

Do not
feel lonely.

The entire universe
is inside of you.

~ Rumi

QUANTUM GOD

The still-force...

Life is the result of the same movement flashing in/out of existence.

Within the movement there is a presence – a still force.

The movement repeats and we are caught in its web; to escape the web we must defer to the movement by recognizing our position in terms of it.

Humanity is a secondary state produced by repetition of the same movement.

Analysis of the 'movement' is analysis of any movement - difference of potential created by resistance.

In every case, resistance precedes movement and thus the original resistance remains ever-present within all subsequence.

Resistance is a force of ignorance that wants to live at all costs – it does not know any better and so it continues to resist what it does not know; it moves to live and cannot do otherwise until its offspring see the dilemma as their own.

Humanity, as yet, has not established recognition of this internal conflict and remains firmly attached to the secondary state.

“It’s easier to fool people than to convince them that they have been fooled.” – Mark Twain.

THE ONE ON HIGH

“I will ascend to the heavens; I will raise my throne above the stars of God; I will sit enthroned on the mount of assembly, on the utmost heights of Mount Zaphon. I will ascend above the tops of the clouds; I will make myself like the Most High.”
– **Isaiah 14:13-14.**

In the beginning there was resistance to eternal love; an objection to inclusion – an attempt to claim one’s own in energy.

The resistance caused the first electric: the first manifestation of resistance in energy; a life-form.

Repetition of the life-form caused the universe to emerge.

All things are accumulation of the same life-form and subject to the **silent** resistance that caused it.

The universal mass of energy aligns hierarchically such that the sum of all in any moment is the one over all.

“The whole is more than the sum of its parts.” – Aristotle.

This is the primal resistance - the one on-high.

A PROCES TO LEARN

If you wish to learn the construct of the universe, take a hairdryer apart and you will find a coil of wire spinning between the opposite poles of a stationary magnet.

The universe is similarly disposed except, whereas the hairdryer is fueled by a/c the universal generator is fueled by **eternity**.

Each turn of the universal wheel has the same energy and the sum of 'energy bits' make up the universe.

The **resistance** that caused the first energy is silently present in all that follows; this is natural for without it, there is no movement at all – no universe!

The mass of universal energy is hierarchically configured, wherein the sum of individual energy systems come under the control of all as one.

But, this 'boss of bosses' is not the highest aspiration of energy.

"The whole is more than the sum of its parts." – Aristotle.

The silent resistance that caused the first 'energy' is the highest of all - the one-**negative**.

PERFECT RESPONSE

Every negative has its positive.

The **silent** resistance that caused the original polarity of positive/negative is everywhere at once...

As the negative experience grows, its opposite must accompany it for one does not exist without the other.

Each advance by the negative is tested by the positive constant.

Each repeat is perfectly aligned to serve our process of recovery.

“We order pain to show the way, perfect, perfect, always perfect!”

THE SILENT ECHO

The cause of time echoes throughout.

The universe was caused by denial of Divinity; an objection that sparked a reaction – energy.

To object, one must think, but before thinking there was the thought that caused it.

Thinking is the movement of thought.

The energy of thought closes to eternity at the speed of gravity.

As closure repeats, each 'bit' of time and the energy that supports it gather and coalesce to become 'time' as we experience it.

Thinking is the means of thought – one and the same!

THE PLANCK PARTICLE

Q1. What is the smallest particle of a substance called?

The resistance that caused the first energy is within the positive/negative reaction.

The energy disappeared as soon as it came to life.

Annihilation is not reconciliation, consequently, the spark repeats until the positive/negative are in agreement.

Thought is the primal resistance that is common cause for the energy that fuels the universe. (fire)

Thinking is the movement of thought, yet, the 'thinking collective' is not thought.

"The whole is more than the sum of its parts." – Aristotle.

Thought is higher than the sum of its parts.

It is the smallest particle of matter with the ability to pass through all larger particles.

The Planck particle: eternity inside out for the least possible time; the resistance that caused it is **Thought**.

.

"As soon as you have made a thought, laugh at it." Lao Tzu

ABUNDANCE

“Eternity is the source of energy.” – Nikola Tesla.

The universe is the result of the same movement cycling in/out of eternity.

This means that each repeat is the beginning of time.

Secondary accumulation of the energy cycle is the expanding universe.

The energy that fuels the universe is ***Free!***

All is One means all things are God.

Thinking fuels the wheel of life: each cycle returning to God/One/eternity; all thinking is supported because God can't refuse God.

We must think our way back...

We are drawing energy from our own bank to support our return to whom we already are. (we go out to gather back)

~

In 1900, **Max Planck** established the energy of the eternally recurring movement as: **$6.62607004 \times 10^{-34} \text{ m}^2 \text{ kg seconds}$** . This is Planck's constant.

Nikola Tesla utilized the information to create inventions that were unprecedented.

And yet, we abhor the very mention of a divine mentor.

.

“You are not a drop in the ocean, you are the entire ocean in a drop.” – Rumi..

DIVINE MENTOR

If we don't center on the beginning, all is destined to fail.

Resistance to eternity/One caused a split that divided the divine one in two.

The first energy: positive/negative separated by resistance.

The primal resistance is too a form of energy and, as such, it has its cause.

The cause of initial resistance is **Thought**.

Thought is common cause and thinking is the movement of thought.

As thinking proceeds, resistance increases and the universe comes to life.

Common cause is immanent, but all is not lost for negative does not exist without positive.

All we have to do is reach out to it.

“Let go and let God.” – Alcoholics Anonymous.
