

THE HAIRDRYER CHRONICLES

Chapter 4 (15 pages)

- The red line represents a movement disappearing out of time.
- The white dots represent the movement trapped in time.

THE COLLECTIVE

The sum of our thinking is sucking the soul out of us.

People come and go but the **Demon** remains.
We are logs to its fire yet we are all that it is.

PLANCK TIME

Planck's constant is eternity inside out: unlimited energy for the least time.

Planck's constant =

$$6.62606957 \times 10^{-34} \text{ m}^2 \text{ kg / s}$$

This force may be held in the palm of your hand.

“To see eternity in a grain of sand...” – Wm. Blake.

The energy packet is the building block of the universe; in limitless supply to support the demands of thinking.

“Draw from it as you will, it never runs dry.” – Tao Te Ching.

Thinking is our learning process and there as many ‘blocks’ as we require to support whatever we wish to pursue.

And, be it known that the **positive** side of the energy block is a perfect sounding board.

Thought it may be war/genocide/atrocity, all is perfect according to our dictates.

“We order pain to show the way.”

THE ONE ON HIGH

“The ‘Unmoved Mover” – Aristotle.

Max Planck described the universe as the same movement going in/out of time.

The movement vibrates to meet the demands of thinking.

“Ask and you shall receive.” – Matthew 7:7

The sum of thinking is the ever-changing body of the universe.

But, there is more...

“The whole is more than the sum of its parts.” – Aristotle.

The whole includes the ‘**unmoved mover**’.

“I will ascend to the heavens; I will raise my throne above the stars of God; I will sit enthroned on the mount of assembly, on the utmost heights of Mount Zaphon. I will ascend above the tops of the clouds; I will make myself like the Most High.” – Isaiah 14:13-14.

THE DEMONIC PRINCIPAL

Each repeat of the Planck movement resets the clock of time; each turn of the wheel displays and regains the universe at the speed of gravity.

The speed of gravity is the force of the movement opening and closing.

Each eternal repeat displays and gathers the universe to eternity.

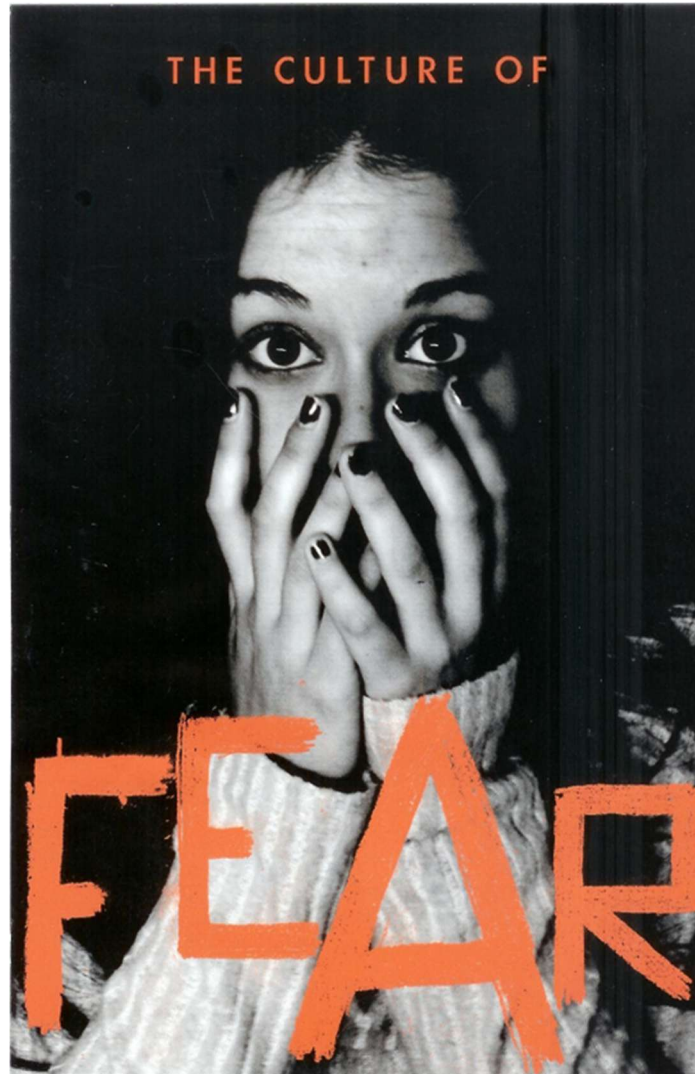

This is happening whether we agree or not.

The process of matter dissolving at the speed of gravity was described in the original **Theory of Relativity**.

But **Albert Einstein** trapped us in time by arresting the movement at the speed of light.

Einstein was a pawn of the demonic Principal.

FEAR IS IMBEDDED

We live under the protection of the collective will and will do our duty when called.

The collective will, is the will of the people:

All as one we are the demonic principal, sending our own to maintain the status quo.

Planck's world was torn apart; friends and peers denigrated and vilified his thesis. But not only that, his entire family was attacked; wife died of Tuberculosis, son died in WW1, twin daughters died one year apart in childbirth, youngest child was executed by the Nazis' in WW2.

The collective is the fire and we are its sparks.

The Demon is the changing sum of who we think we are – all as one.

Step outside your carefully validated conditioning you will discover the Demon upfront and personal.

Fear is imbedded.

“We must build dykes of courage to hold back the flood of fear.” –
Martin Luther King King. Jr.

WARRIOR

The warrior on the path
Is always alone
A quiet riot
Breaks new ground
Fearlessly enters no-man's land
Seeking fear - hunting it!
Knows the journey is within

Where humility knows no praise
Where pain is a bandage
Where rejection is the norm
The Warrior's concern is not to be caught unaware
Needs the frontier
The cutting edge
Reconciled to equanimity
Accepting - powerful!

The Warrior does not want to control
Wants to shape-shift
Wants to die into every moment
To participate in everything & all
Ultimately becoming nothing at all
To be re-born
Naked before the Kingdom.

DEMON

The sum of who we think we are is the antithesis of God.

Science is but an instrument for the demon to play.

“Whence come I and whither go I? That is the great unfathomable question, the same for every one of us. Science has no answer to it.” - Max Planck.

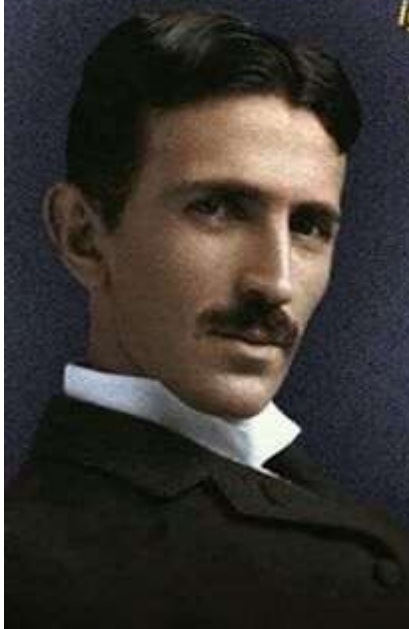

Planck’s constant is the highest challenge to the status quo.

“Even Planck tried to make it fit: “My unavailing attempts to somehow reintegrate the action quantum into classical theory extended over several years and caused me much trouble.” Several years later, other physicists like Rayleigh, Jeans, and Lorentz set

Planck's constant to zero in order to align with classical physics, but Planck knew well that this constant had a precise nonzero value. "So much the worse for the facts if they don't fit." - Alexander Wilhelm von Brill - held a chair at the University of Tübingen, where Max Planck was among his students.

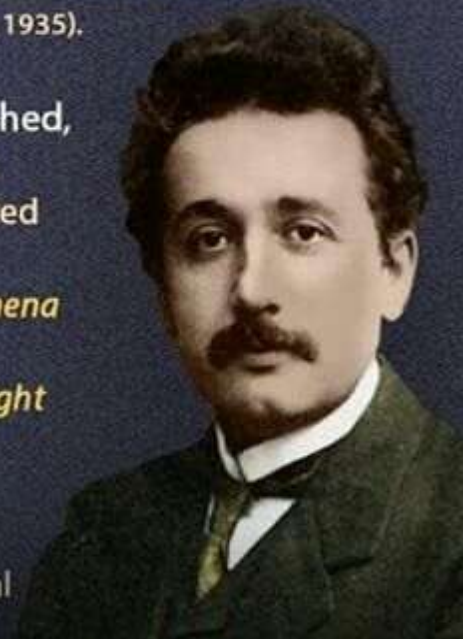

Tesla on Einstein

When asked for his opinion on the theories of contemporary Albert Einstein, Tesla gave a scathing analysis of Relativity theory, calling it a *"magnificent mathematical garb which fascinates, dazzles and makes people blind to the underlying errors. The theory is like a beggar clothed in purple whom ignorant people take for a king"* (Time, 1935).

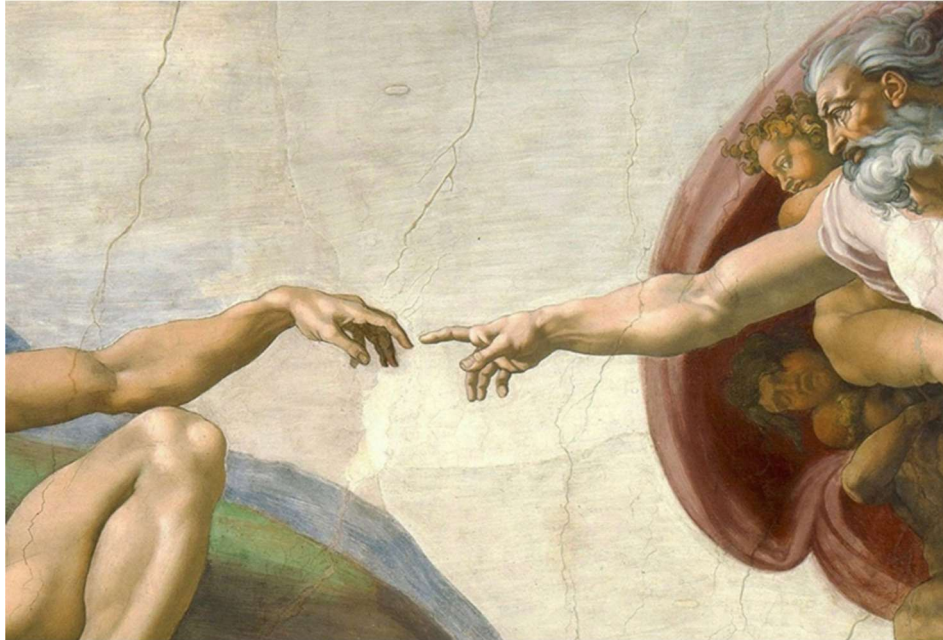

Tesla's own theorem went unpublished, yet his inventions displayed a beautiful simplicity that reflected the natural order:

"My explanations of natural phenomena are not so involved as his. They are simpler, and... will throw light on many puzzling phenomena of the cosmos" (Time, 1931).

TOUCHING THE DIVINE

Planck's constant is a straight run to eternal love.

As we think we vibrate the movement and this proximity increases the probability of connectivity.

Enter the Demon to place roadblocks: the true path was arrested at the speed of light and diverted into cyclic distractions that drain our real potential.

Albert Einstein was a pawn of the Demon.
