

THE MASTER OF THE WHEEL

The first form of resistance turns the wheel of life.

The handheld cyclic/linear is the prototype of the universe.

Ohm's Law is a reciprocal relationship that distributes power within a system without loss.

The universal power system was discovered and measured by **Max Planck** in 1900.

Planck's constant is unlimited power for the least time; from this the universe is generated.

As the wheel turns it re-distributes power without loss; each turn a new beginning.

Eternity gives unconditionally.

“Draw from it as you will, it never runs dry.” – Tao Te Ching (340BC)

Each turn adds to the universal whole, one face at a time according to Ohm's law.

E=IR

(E) is the power of the wheel, (I) is the time it took to happen, and (R) is the resistance that caused it. (precedes)

As the wheel turns the primal resistance presents a new face at each turn.

The master of the wheel has a free ride.

Eternity supports all without condition for resistance must be relinquished by one's own accord – **One is all.**
