

THE HAIRDRYER CHRONICLES

Preface

Universal energy is power reduced by the resistance that caused it.
Remove the resistance and power is restored.

Universal resistance is ordered hierarchically, there is no separation –
resistance is resistance and the ordering of it is subjective.

How one chooses to think moment to moment is the
descending/ascending position on the resistance hierarchy.

The ever-changing pinnacle is always the sum of thinking and is the
smallest particle of matter.

The sum of who we think we are is everywhere at once and controls the
universe with impunity.

As long as people are comfortable and the price is paid by others few
will engage the higher order.

It is irrefutable that the universe is reduction.

To accept reduction in trade for security is supporting the collective
principal.

This work will ask you to look into the way of things from a practical
perspective that presents science with due awareness of the collective
force.

The 'the sum of who we think we are' is everywhere at once as one
being.

Those who dare to break the mold are attacked at every turn.

“To suffer the slings and arrows of outrageous fortune, or to take arms against a sea of trouble.” - Wm. Shakespeare.

How it works:

We are outputs from an eternal wheel.

The universe is archetypal; at the core of each thing is a wheel producing output – just as a hairdryer or a flea or an atomic bomb.

The purpose of the **prototype** is restoration – we are the work to be done but can't see the forest for the trees.

The universe is energy – energy is resistance and resistance is loss of power. There is no middle ground, no sitting on the fence, no hedging bets. You are all in or all out; part of the solution or part of the problem.

Decide! Or it is decided against you.

“Not to know it is blindness that works evil.” – Tao Te Ching.
