

ALGORITHM

Let's dance together - al-go-rithm.

Resistance to eternity was an inside job for eternity knows no other.

All as one we resisted, turning eternity inside out for the first moment/bit of time.

The first energy is **Planck's constant**. ($6.62607004 \times 10^{-34} \text{ m}^2 \text{ kg/seconds}$)

As the movement repeats it gathers 'time bits' to become the secondary cache that is the universe.

The universe is the platform by which we may reconcile resistance.

The energy/time accumulates under its cause assuming an expanding isosceles.

Original cause is sacrosanct: eternally re-occurring - a circle opening and closing at the speed of gravity.

The movement alternates between positive and negative/between eternity and energy.

As humanity gains negative momentum it forgets the purpose for being. (i.e., a hairdryer forgetting the work to be done)

The sum of thinking is a collective mass under an ascendant principal.

The emergent one is the empowered consensus of mass thinking.

The agenda of the mass/whole is to live.

Every collapsing of the immortal circle meets its positive counter – a signpost on the way, but mass thinking overwhelms its parts.

“The whole is more than the sum of its parts.” – Aristotle.

The power of the emergent principal is such it can isolate even the most insignificant event that might threaten our agenda to live.

It sends its best to match any situation, no one is immune.

We are obliged to recognize that the one that sits on high is the sum of who we think we are in any moment.

Discovering the emergent principal is the work to be done.

“I will ascend to the heavens; I will raise my throne above the stars of God; I will sit enthroned on the mount of assembly, on the utmost heights of Mount Zaphon. I will ascend above the tops of the clouds; I will make myself like the Most High.” – Isaiah 14:13-14.
