

# INDOCTRINATION

**“There’s simply no polite way to tell people they’ve dedicated their lives to an illusion.” — Daniel Dennett**

The universe is the secondary result of one movement cycling in/out of eternity.

but people do not care to receive this for they have been seduced to believe that life is real - we can think and feel – we can pinch ourselves and feel the pain.

We don’t want to deal with information that may challenge our thinking especially so if we are in control of our lives.

We feed from our troughs and leave the big question to those best suited for such discourse.

Divide and conquer is the way.

**““Oh, East is East, and West is West, and never the twain shall meet.” – Ruyard Kipling.**

The entire universe is a mass of resistance and few realize that because we are the secondary results of one movement, we are the thinking of one thought.

Thought is the resistance that caused the movement that produces the universe simply by thinking about it.

The thinking of thought divides to conquer but thought is high and above all it becomes.

**“The whole is more than the sum of its parts.”** – Aristotle.

We are the fickle mass and it is our purpose to rise higher than the master we serve.

This is the real purpose of existence.
