

# NEGATIVE MOMENTUM

A spinning top rotates from a center that is relatively still, the Dervishes and Irish dancing present the same theme, as does most traditions throughout the ages.

**“ Ancient Egypt’s wisdom view  
Druidic message channeled through.”**

In the beginning Love/Eternity was resisted – one is all became energy and, for the least **time**, all became one.

All as one is the antithesis of God/eternity.

The energy packet re-occurs until balance is restored.

**“What you resist, persists.”** – Carl Jung.

We go out to gather back; a spreading lack-of-ease emanating from a center that has the least movement of all.

The primal dynamic is a circle alternating between positive and negative; an oscillation.

This sets up as a generator producing output.

The purpose of the output is to reconcile in **time**.

The antithesis is the hidden center of everything: everywhere at once as **the sum of who we think we are**.

We, all as one are the center of everything.

Gathering to eternity with each eternal beat.

We are cause and effect and until this is rationalized by common sense the demon in our heads will continue to orchestrate the negative momentum.

**“Simplicity is the ultimate sophistication.”** - Leonardo DaVinci.
