

# THE PRIMAL TRICKSTER

“Whence come I and whither go I? That is the great unfathomable question, the same for every one of us. Science has no answer to it.”

- Max Planck.

What is behind your eyes  
holds more power than  
what is in front of them.

All together as **one** being, we are the resistance that caused the split with unity/eternity.

The first **energy** is eternity inside out for the least time possible.

This is a circle opening and closing ad infinitum; a rotating wheel producing output – an electric generator. (A prototype producing archetypes).

This is the mechanism of the universe.

The resistance (all as one) behind the movement is the antithesis of God – high and above its individual outputs.

**“The whole is more than the sum of its parts.”** – Aristotle.

We are the constitution of this superlative.

The entire universe disappears with each opening and closing.

The sum of who we think we are is a trickster; high and above all it becomes, directing its tour-de-force - one frame at a time.

**“I will ascend to the heavens; I will raise my throne above the stars of God; I will sit enthroned on the mount of assembly, on the utmost heights of Mount Zaphon. I will ascend above the tops of the clouds; I will make myself like the Most High.”** – Isaaah 14:13-14.
