

THE QUANTUM MIND

The universe is the output from one eternally recurring movement.

We are posturing as real; facades that hide the truth. The resistance that caused the movement is intimately involved with its product.

“Ultimately, the entire universe...has to be understood as a single undivided whole.” - David Bohm

"As a man who has devoted his whole life to the most clear-headed science, to the study of matter, I can tell you as a result of my research about atoms this much: There is no matter as such. All matter originates and exists only by virtue of a force which brings the particle of an atom to vibration and holds this most minute solar system of the atom together. We must assume behind this force the existence of a conscious and intelligent mind. This mind is the matrix of all matter."

- Max Planck.

...

Explanation:

The universe is the secondary result of one movement repeating.

The movement is a packet of energy called **QUANTUM**

One movement is all there is and within the movement there hides its cause

The cause is the **resistance** that precedes the movement:

The movement could not happen without resistance therefore it is reasonable to conclude that the primal resistance is 'still' within the subsequent secondary's that emanate as the result of the movement's frequency: the world/universe.

The movement (precise quantity of energy/quantum package) is rooted in eternity. This means the movement is unaffected by frequency - each repeat the same energy – each repeat the beginning of time.

Thinking drives the frequency that produces the universe and no matter the speed of repetition the silent resistance is immanent.

Our purpose is to use thinking to gain the information necessary to release the silent resistance - we go out to gather back and until we finally come to realize that the primal resistance is a 'conscious and intelligent mind' with its own agenda to remain in control, we will continue to be stymied in our efforts to release this entity from owning our experience.

We are the experience of resistance.

The **sum** of who we think we are is all as one - everywhere at once.

“I received a telephone call one day at the graduate college at Princeton from Professor Wheeler, in which he said, “Feynman, I know why all electrons have the same charge and the same mass” “Why?” “Because they are all the same electron!”

- Richard Feynman.

The quantum mind is the antithesis of God.
