

# THE SMALLEST PARTICLE

“Everything in this Universe is comprised of the same electron existing in different time, at the same time.” - John Wheeler and Richard Feynman.

All as one is the **antithesis of God**, 'One is all' is God.

You are God, I am God and so is my dog or a bowl of rice...

“**Treat everyone that you meet as if they are God in drag.**” – Alan Watts.

In the beginning, there came a resistance that turned **eternity** inside out for the least time.

This movement over time is the **Quantum**.

The energy of the quantum packet /seed is **Planck's constant**.

The seed grows by repetition.

The expanding universe is the same packet of energy repeating to the demand of thinking - without frequential loss because the movement is drawn from eternity.

**“Draw from it as you will, it never runs dry.”** Tao Te Ching (340 BC)

Whether a tree, a flower or a human being, all things are emanating from the eternal source.

The universe is a movie playing one frame at a time; our separate lives/movies incorporating the one overall.

All our life movies are pathways to eternity/heaven.

**“Not to know it is blindness that works evil.”** – Tao Te Ching.

The resistance that initiated the frame is the antithesis of God; it is the **first energy**: the smallest particle of matter, and because it is everywhere at once it is both cause and effect.

The first energy is **thought** and we are the thinking of thought.

**“Same, same but different.”** – Buddhist saying.

Thought direct all that it is with impunity.

**“To get back to the real substance of all things, you must get back into the thought world. Until one knows that the thought-energy is the cause of which is back of all things, and the product only the effect, then he is tied to the effect and is limited by it.”**

- Walter Russell.
