

TRICKSTER

The trickster is the sum/aggregate of who we think we are – **all as one**.

“The whole is more than the sum of its parts.” – Aristotle.

The **first** resistance is everywhere at once. (smallest particle)

This is **thought**.

We are the thinking of thought.

“**Same, same but different.**”

Energy formulations are naturally **hierarchical**: thought is the one on high.

'I will ascend to heaven; I will raise my throne above the stars of God; I will sit on the mount of assembly on the heights of Zaphon; I will ascend to the tops of the clouds, I will make myself like the Most High".

~ (Isaiah 14:12-14, NIV).

Eternal denial is encased in a quantum of energy that is disappearing and re-appearing at the speed of gravity. (the speed of time)

Planck's constant. Is the smallest particle of matter.

Thought is high and above, directing its own - one frame at a time.

Not until we rationalize the eternally recurring universe can we come to terms with this information.

Meanwhile:

"The trickster dances in the shadows, always one step ahead of the game."

– Joseph Campbell
