

# THE BELL IS TOLLING

“Whence come I and whither go I? That is the great unfathomable question, the same for every one of us. Science has no answer to it.”

~ Max Planck.

The first positive/negative was held apart by a resistance that is the antithesis of God/eternity.

As the circuit repeats the resistance grows the body of the universe, a body whose mind is the changing sum of who we think we are.

The mind of humanity is all as one.

As the body grows the quality of its awareness reduces.

The collective descends into ignorance that protects against challenges to its tour de force.

The sum of who we think we are has the advantage of being everywhere at once; it is antithesis.

This sum of who we think we are is high and above:

**“I will ascend to the heavens; I will raise my throne above the stars of God; I will sit enthroned on the mount of assembly, on the utmost heights of Mount Zaphon. I will ascend above the tops of the clouds; I will make myself like the Most High.”** – Isaiah 14:13-14.

We are driven by a dangerous presence and still have little awareness that its ascendant dynamic is the challenge we must face to resolve our resistance to eternity.

It's a test we have created by who we are - One is all means everything is God.

Positive and negative are wings of the same bird but humanity resists the positive identification that is manifest with each twist of the eternal revolution.

We are failing to rationalize our divine prerogative.

Science has no answer to it.

**“The monster is feeding in our garden  
The bell is tolling  
But we are oblivious.”**
