

THE INFINITY TWIST

“Hold infinity in the palm of your hand.” - William Blake

The universe is the secondary result of one eternally recurring movement.

The movement is **Planck's constant**. ($6.62607004 \times 10^{-34} \text{ m}^2 \text{ kg seconds}$)

The recurring movement is a twist of energy that occurred when **all as one** we resisted eternity.

Eternity cannot divide – it twists.

The twist is first energy and the universe is accumulation of same.

The universe disappears with each eternal re-occurrence.
