

THE HAIRDRYER Chronicles (BOOK 2)

Work in Progress...

We must start from the beginning.

The world/universe is the secondary result of one eternally recurring movement.

"Except ye be converted, and become as little children, ye shall not enter into the kingdom of heaven." - Matthew 18:3

"Hold eternity in the palm of your hand." – Wm. Blake.

The eternal exodus began when eternity was twisted from one is all to all as one.
The twist instantly re-shaped to a circle that shorted back to eternity.
The condition repeats until all is reconciled.
This is eternal recurrence: a wheel turning to produce output – a generator.

The output is the means to resolution.

Each turn of the eternal wheel generates **free** energy/time for the work to be done.

Each turn produces an archetype of the original.

The teaching tools are all around us.

AS THE WHEEL TURNS

One is all describes eternity.

Eternity experienced resistance and twisted as if poisoned.

We are eternity with an illness to be healed.

The convolutions continue until we are well again.

We would rather suffer than discover who we are.

“People will do anything, no matter how absurd, in order to avoid facing their own Soul.” – Carl Jung.

One **is** all means everything is God – NOW!

The resistance that caused eternity to ‘do the twist’ is an electrical circuit: the first moment of time.

As the circuits repeats time follows.

The cause of the first resistance is unknown but will be known when we have recovered from our illness.

Each twist is the same resistance accumulating time for us to heal.

This is a cycle producing output. (a generator)

We are psycho-emotional constructs with little or no awareness of where our energy come from.

"It is important to realize that in physics today, we have no knowledge what energy is. We do not have a picture that energy comes in little blobs of a definite amount." – Richard Feynman.

The ‘little blobs’ are the pulses of energy generated to produce time for reconciliation.

THE EXODUS

The little man turning the wheel is **thought**, we are the movement of thought – forms of thinking.

“Same same, but different.” – Buddhist.

The big man uses the circular medium to maintain the exodus - we must go out to gather back of our own will.

**“Do not seek progress as
Progress exists only in time
The goal stands
Outside of time.”**

- Wu Hsin (400BC)

HOMeward BOUND

All of life is an attempt to gather back to home/eternity.

This cannot begin until we discover where home is.

“The wind blows wherever it pleases. You hear its sound, but you cannot tell where it comes from or where it is going. So, it is with everyone born of the Spirit.”

– John 3:8

We are here to learn our way home through the experience of energy.

Energy began with denial of eternity.

All as one we resisted and the energy twist that followed took the least time before untwisting back to eternity.

Each repeat has the same energy – **free**, on demand!

The quantum of energy repeats in stops and starts, and the secondary accumulation enables time/energy for the work to be done.

The universe twists and returns until the way is clear.

THE BEAST OF OUR DISCONTENT

Eternity is completion.

One is all.

This is the knowledge we avoid because it requires letting go of who we are, in deference to who we think we are.

We simply don't believe in ourselves.

To understand our weakness in the face of truth it is necessary to realize that as the universal wheel turns through eternity it emits a collective mass of resistance that is controlled by its own sum.

The mass serves the collective will.

Individually we avoid responsibility but collectively we are ferocious.

The beast of our discontent has no life of its own.

It is who we wish to be without admitting it.

All that happens is by consensus, there is no other

MORE THAN WE THINK

The world/universe is the secondary result of one eternally recurring movement.

“The whole is more than the sum of its parts.” – Aristotle.

In the beginning **eternity** was twisted inside out for the least time.

This was the first electric circuit: positive/negative/resistance.

The first circuit was outside of time, or time as we relate to it.

It was the **wheel** before it began to move.

Each turn of the wheel increases negativity/resistance whereas its positive counterpart remains constant - at the right hand of God/eternity.

The positive answers each negative with absolute clarity.

But we refuse because the demon has us under its wing.

The demon is the sum of who we think we are – there is no other.

“The whole is more than the sum of its parts.” – Aristotle.

“Within the structure of the universe there is a demon that is very specific to everything that owns form, especially the human form. It exists in all things equally just as does its complementary opposite God. The battle rages on levels of discontent that have no awareness in time. It takes a powerful awareness to expose this demon because it is the pervasive element behind all activity. It is the hidden fool pretending to be aware of nothing while it exists in complete awareness.”

- Excerpt; The Trinity Conspiracy by Tom Kitt (2003)

CATCH ME IF YOU CAN

The world/universe is the secondary result of one eternally recurring movement.

Eternal recurrence is a movement disappearing out of time only to continue re-appearing until the resistance that caused it is reconciled.

The first movement was an electric circuit answering to the attributes of positive, negative and resistance.

Each reappearance accumulates the same circuit.

Now, it may appear logical that the primal resistance is everywhere at once within the secondary universe.

But this is not the case because resistance knows no other but resistance, consequently, the mass of resistance is the sum of who we think we are in each new moment.

We are as stones using a bag of stones for protection.

No one can catch me at my game.

THE WING OF THE BEAST

The world/universe is the secondary result of one eternally recurring movement.

The universe is energy.

Energy began when the eternal One was resisted – ‘One is all’ became ‘all as one’ for the least **time**.

‘One **is** all’ is never separated from itself and the energy created by resistance is an eternal ‘twist’ that returns to balance in the least time,

Therein to continue repeating until its cause/resistance is shed.

God/eternity never leaves us and the energy twist is but an illusion, albeit a very convincing one.

The first energy/movement was: positive, negative and resistance.

The positive sits at the right hand of God and the negative is held apart by resistance.

This construct is the wheel of life.

As the wheel turns, resistance grows.

Resistance is never apart from its own sum - it is all as one.

Every turn of the wheel meets its positive opposite – perfect!

But, the sum of all fly’s higher than its parts – everywhere at once.

“The whole is more than the sum of its parts.” – Aristotle.

The secondary output is seduced by the sum of its own thinking.

This is the challenge we must face...

The challenge to see through the demon we have created to protect who we think we are.

THE WHOLE

A rock is stronger than its parts.

The world/universe is the secondary result of one eternally recurring movement.

The first energy was a movement: positive, negative and resistance.

The circuit was the blueprint for a wheel; the transport for resistance.

The means of exodus.

The birth of resistance occurred when, all as one, we resisted eternity, causing the **illusion** of eternity twisting inside out for the least time. The twist untwists in an instant but then continues re-appearing until the resistance is reconciled.

Thus, the growing resistant became its own issue to solve.

The sum of the resistant parts is stronger than any one – like a boulder to a stone.

We are locked in prisons of our own making and must learn where we come from before we can set our course to home.

This is the test of life.

The first circuit is positive/negative driven by resistance, and whereas the negative grows to become the rock of the universe the positive remains sacrosanct.

Each turn of the eternal wheel touches positive before re-assimilating into the whole.

“The whole is more than the sum of its parts.” – Aristotle.

“I will ascend to the heavens; I will raise my throne above the stars of God; I will sit enthroned on the mount of assembly, on the utmost heights of Mount Zaphon. I will ascend above the tops of the clouds; I will make myself like the Most High.” –

Isaiah 14:13-14.

SETTING THE COURSE

If we don't navigate correctly, we'll be travelling forever.

Each human being is as a ship on the ocean without a means to navigate.

Mostly we find safe-havens and gather like-kind for protection.

We are all energy yet it appears that few if any are aware of how energy began.

Navigating the world is well accomplished but navigating one's soul is an entirely different matter.

The first energy was a reaction to resistance just as is all things.

The resistance began when all as one we challenged eternity.

This resulted the first energy which was an eternal twist that continues to pulse throughout the universe.

The 'pulse' is as a wheel turning, each rotation feeding the universe until the resistance is reconciled.

One wheel producing output is all there is.

The universe is an inundation of archetypes/replicas of the original movement.

To navigate home we must first know that the entire universe is the secondary result of this same wheel turning.

The wheel is the first electric circuit; a positive and negative divided by resistance.

As the wheel turns the negative expands whereas the positive remains.

Each turn is refreshed by the positive before assimilating back into the collective experience - the collective whole.

The individual is lost in this collective that protects its own like a watchdog.

The watchdog's ignorance is the sum of our ignorance.

This is the ultimate demon.

We complicate ourselves and the demon enables us to insist.

The way out from under this monster is to learn where we come from and set our course to home.

And, this is easier done than said for the demon is everywhere at once.

One must gain the wherewithal to apply the hairdryer archetype to its prototype, then to know that the resistance that caused the prototype as the antithesis of God.

The world is a twisted knot to be unwoven.

Eternal love is around every corner.

“Simplicity is the ultimate sophistication.” – Leonardo DaVinci.

The THEORY of RELATIVITY explains the disappearing universe.

THE DISAPPEARING UNIVERSE

The world/universe is the secondary result of one eternally recurring movement.

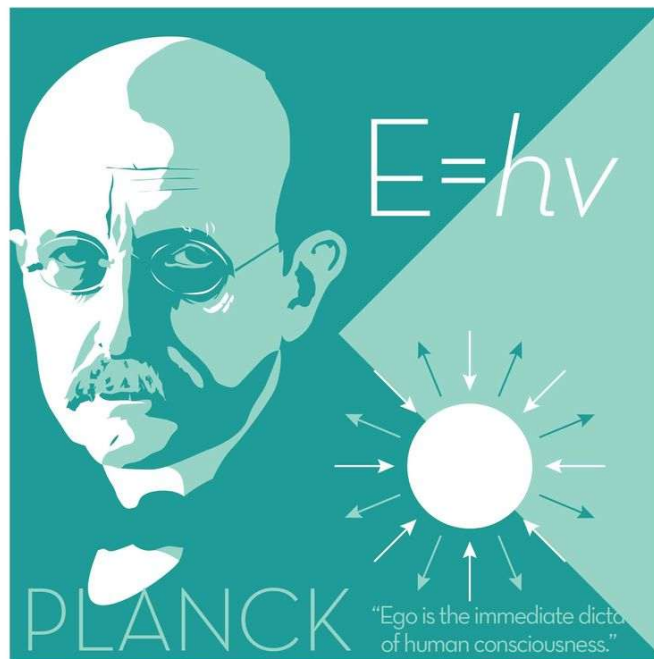

“According to a theory proposed by theoretical physicist John Wheeler, who outlined his thoughts in a conversation with fellow physicist Richard Feynman there is only one electron – it just looks like there are a lot more because it is moving forward and backward in time.”

The entire universe is disappearing and re-appearing with the electron.

The value of the electron is $6.62607004 \times 10^{-34} \text{ m}^2 \text{ kg seconds}$.

This is Planck’s Constant.

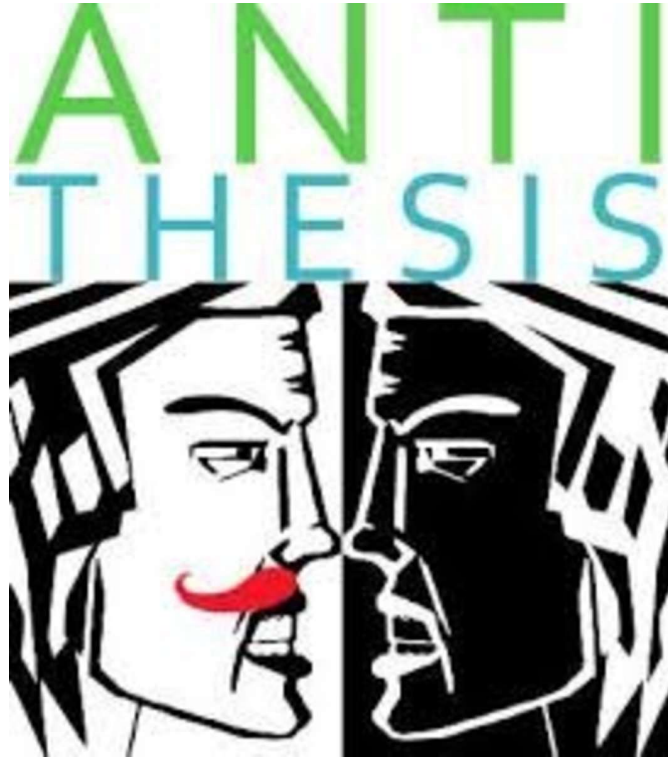

It is also the Quantum.

The above information has been interfered with by the **sum** of who we think we are.

Because the universe is energy, everything is illusion – all
is possible.

ANTITHESIS

Eternity resisted itself and turned inside out for the least time.

‘Inside out for the least time’ is a twist of energy.

As the twist repeats it appears a circle opening and closing.

As the ‘wheel turns’ the universe expands as secondary issue.

The universe is a mass of archetypes of the original prototype.

One such archetype is a hairdryer or indeed anything at all without exception; take something apart and you will find a rotating wheel producing output.

The primal resistance caused the beginning of time.

The universe is accumulation of the same bit of time.

The ‘time bit’ has positive, negative, and the resistance that pushed it to happen.

The pusher/resistance is the antithesis of God.

As the wheel turns the universe comes alive in the negative collective.

The positive has a perfect view and does not move.

All things pass through positive enlightenment on their way to rejoin the collective.

This is the other side of the coin for us to decide.
