

NON-ZERO

A sink draining to ETERNITY

ETERNITY has a non-zero value.

Time began when ETERNITY experienced resistance thus causing a twist - Eternity is inseparable.

The twist was the beginning of energy/time and no matter how we twist and turn all is returning home with each succeeding twist.

We are the result of one particle of energy gaining time for the sole purpose of returning to where we come from.

“It is important to realize that in physics today, we have no knowledge of what energy is.” ~ Richard Feynman (1918-1988), Nobel Prize winner.

The energy particle is cycling in/out of time creating experiences on a secondary level - a generator with a primary and secondary.

Every human being holds the latent memories of all that went before.

All folding in/out of ETERNITY - a circle opening and closing, collapsing to non-reference.

Thinking is driven by the intrinsic fear of loss should we discover this 'wrathful God' we so deserve - or so we choose to believe until we take the decision to enquire further.

Meanwhile, we run with the pack.

I too have ridden with Genghis Khan, savaged the innocent, and warred just for the thrill of it.

We don't return in the same form, but always we always return in perfect form.

We are processing to the Way - the straight path as described by the Tao Te Ching.
- the straight path as indicated by $F=ma$ and $E=hv$.

“Every living being is an engine geared to the wheelwork of the universe. Though seemingly affected only by its immediate surrounding, the sphere of external influence extends to infinite distance.” – Nikola Tesla : February 7, 1915.

All is forgiven when we accept eternal recurrence.

Entering this experience is true connection.

Planck's constant goes the distance, and it behooves one to begin enquiry by acknowledging that the quantum is a movement out of time.

- Planck's constant has a non-zero value that threatened the classical model, and so, it was adjusted to fit in.

“Even Planck tried to make it fit: “My unavailing attempts to somehow reintegrate the action quantum into classical theory extended over several years and caused me much trouble.” Several years later, other physicists like Rayleigh, Jeans, and Lorentz set Planck’s constant to zero in order to align with classical physics, but Planck knew well that this constant had a precise nonzero value. “So much the worse for the facts if they don’t fit.”

~ Alexander Wilhelm von Brill - held a chair at the University of Tübingen, where Max Planck was among his students.

The sum of who we think we are; is a mass that protects itself.
