

# THE EINSTEIN CRISIS

The universe is the secondary result of one eternally recurring movement (Planck's Constant).

Each repeat eliminates the universe.

The process of elimination was described by Mileva Maric in her **Theory of Relativity**.

Maric was married to Albert Einstein at the time.

The famous 1905 paper had one signature.

Einstein took sole credit.

His ego took over, he did not comprehend the eternal conclusion of Maric's thesis and unwittingly blocked it at the speed of light.

Einstein was a pawn of the collective whole - the antithesis.

"The whole is more than the sum of its parts." - Aristotle.

Einstein was lauded to be a genius as his  $E=mc^2$  thesis wreaked havoc.

**"The buck stops here."** - Harry Truman.

In the course of this insanity, Max Planck's eternal constant was disassembled and re-routed to become the 'hamster wheel' that is the quantum mechanics we aspire to today.

**"Every living being is an engine geared to the wheelwork of the universe. Though seemingly affected only by its immediate surrounding, the sphere of external influence extends to infinite distance."**— Nikola Tesla : February 7, 1915.

- The square of anything is a crash-point.
